DETAILED ACTION

1. This office action is in response to amendment dated: 5/17/07. Based on this amendment, claims 1-12 are pending.

Allowable Subject Matter

2. Claims 1-12 are allowed.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose, teach or suggest directly, or indirectly the following limitations in combinations with other limitations of the claims, as follows:

As recited by claim 1,

- an extracting unit to extract a clock from an output signal of the changeover unit,
a PLL circuit to receive the clock from the extracting unit and to output an output for extracted clock,
a clock changing unit to receive the output signal with the output clock of the PLL circuit, and
a framing unit to frame output data of the clock changing unit with the output clock.

As recited by claim 2,

Art Unit: 2617

- two extracting units to extract data and a clock respectively of two input signals which are mutually asynchronous ha phase,
a first and a second reference clock changing unit to change the respective data with a reference clock inputted externally,
a first changeover unit to change over from one to another of data respectively outputted from the first and the second reference clock changing unit,
a second changeover unit to change over from one to another of clocks extracted by the extracting units,
a PLL circuit to receive the clock from the second changeover unit and to output an outout clock, and
a clock changing unit to change output data of the first changeover unit from a clock before the changeover to an output clock of the PLL circuit.

As recited by claim 2,

- each redundant changeover apparatus comprises a changeover unit to change over from one to another of two input signals which are mutually asynchronous in phase, an extracting unit to extract a clock from an output signal of the changeover unit, a PLL circuit to receive the clock from the extracting unit and to output an output clock, a clock changing unit to receive the output signal with the output clock of the PLL circuit, and a framing unit to frame output data of the clock changing unit with the output clock, and generates outputs of the clock changing unit of the working system and the protection system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art of Record

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nishihara (US Patent No. 6,512,616) discloses "An optical packet switch uses electric circuits to implement input and output sections of an optical switch that performs packet switching.
